

4.0 Detailed guidelines of the order message within Volvo

4.1 General

This document describes Volvo's application of the EDIFACT message for purchase order (ORDERS) and its relations to order response (ORDRSP) and order change (ORDCHG).

The specification offers a detailed description of those data elements which will be used including recommended code listings. Special attention to code listings is needed if transfer and transformation to ANSI X12 is done for the U.S. market. See, Cross listing below at appendix 3.

The basis of the application is the EDIFACT message entitled ORDERS version D96B issued by UN in September 1996.

The frequency and scope of the ORDERS message are specific for each company within Volvo.

Relations to other messages:

ORDERS message has strong relations to the Order change message (ORDCHG) with which changes to the content of a previous ORDERS can be made. ORDERS message can also ask supplier for a order response. Such response is performed by order response message ORDRSP.

Message usage:

It is important in all communication that buyer's and seller's prime references must be given. This to allow automatic processing in the order cycle, without manual intervention. That is also why free form text in a message is not recommended.

Message constrain:

It is important to understand that the message can handle more than one Consignee in the detail section. But this is only possible as long as those consignees have the same Invoice address in the Header section. If this is not the case a new ORDERS need to be created.

Buyer to Seller communication is done by using

- ORDERS message for original order
- ORDCHG message for either
- changes to original ORDERS message
- confirmation on proposal for changes coming on a ORDRSP message from supplier.

Seller to Buyer communication is done by using

- ORDRSP message for either.
- strict confirmation of received ORDERS or
ORDCHG message from buyer
confirmation with full ORDERS or ORDCHG
message content
confirmation of ORDERS or ORDCHG message
with proposals to changes.

4.2 The purpose and the basic function of the message

The purpose of purchase order is to provide the seller/supplier with essential information involved in purchase of the following goods and services.

- * To buy parts to a Volvo production or aftermarket facility.
- * To buy Tools and tooling.
- * To buy Sample parts out of tools.
- * To buy Non Automotive Parts(NAP) or Material, Repair and Operations (MRO),for goods and services.
- * To buy Products from a Volvo manufacturer.
(i.e. Vehicle, Engine...)

The message may contain the following information:

- * Who is the buyer.
- * Who is the seller.
- * Payment Terms.
- * Delivery conditions.
- * Item number or description of goods.
- * Quantity of goods.
- * Where to deliver (consignee).
- * When to deliver (if Stand Alone Order).
- * Where to send Invoice.

4.3 Definitions

4.3.1 Order types

A Purchase can be done in two different ways.

4.3.1.1 Contract or Blanket buying (BGM 1001 code = 221)

Contract and Blanket buying have basically the same purpose, that is to establish long-term relations with a supplier and use delivery schedules, or DELINS message, to actually specify when and how much shall be delivered at a certain time. Contract and Blanket may or may not carry estimated annuals quantity information.

4.3.1.2 Quantity and Stand Alone buying (BGM 1001 code = 220)

Quantity buying is used when buying larger quantities at a certain price. Quantity is always given but delivery date can be left out indicating that a delivery schedules will come and specify When, Where and How many shall be delivered at a certain time.

Stand Alone buying is used, when Price, Quantity, What to send, and where to send is given in the order message.

4.3.2 Requisition types

A Purchase can be requested by using different types of requisitions. This can, together with order type, be indicated in the IMD. Please, see 4.6.3, IMD in header message.

4.3.3 Name and Addresses

A Purchase can have three NAD's indicating various kinds NAD segments.

4.3.3.1 Buyer (NAD 3035 code = BY)

BY tells who the buyer is. BY can also be the Goods Receiver(Consignee) and the party to Invoice. If this is the case either NAD CN or NAD IV or both will not be found in message.

4.3.3.2 Seller (NAD 3035 code = SE)

SE tells who the seller is.

4.3.3.3 Invoicee (NAD 3035 code = IV)

IV tells where to send invoice. If not given it is the same as BY.

4.2.4 Delivery Party (NAD 3035 code = DP)

DP tells where goods are regrouped during its transportation to final destination.

4.2.5 Consignee (NAD 3035 code = CN)

CN tells where to send goods. If not given it is either

- same as BY
- given in Detail section NAD

4.2.6 Ultimate Consignee (NAD 3035 code = UC)

UC tells where goods finally will end up if CN is not the final goods receiver.

4.4. Message Content

4.4.1 Minimum Order content

4.4.1.1 Header segment:

UNH (heading section)

0062 = number

0065 = ORDERS

0052 = D

0054 = 96B

0051 = UN

0057 = association assigned code

BGM (header section)

1001 = 220 (Stand Alone)

1004 = sequential number

DTM (header section)

2005 = 137

2380 = date as CCYYMMDD

2379 = 102

NAD (segment group 2).

3035 = BY (buyer)

3039 = Sellers id on Buyer

3055 = 91

NAD (segment group 2).

3035 = SE (seller)

3039 = buyers id on seller

3055 = 92

4.4.1.2 Detail segment:

LIN (segment group 25)

1082 = unique line number

7140 = Part/Item number

7143 = IN (buyers item number) or SA (suppliers item number)

PIA (segment group 25)

4347 = 1 (additional information)

7140 = Part/Item number

7143 =VN (vendor item) or IN (buyers item)

or (if part number is not known a description is needed)

LIN (segment group 25)

1082 = unique line number

IMD (segment group 25)

7008 = item description

QTY (segment group 25) (On Contract/Blanket orders QTY may not be given)

6063 = 21 (Ordered quantity)

6060 = quantity

DTM (segment group 25) (On Contract/Blanket orders delivery date/time may not be given)

2005 = 2 (delivery date/time requested)

2380 = date in CCYYMMDD

2379 = 102

UNS (summery section)

0081 = S

UNT (message trailer)

0074 = number of segments in the message

0062 = message reference number

4.5 Message code constrains and ANSI X12 relations

4.5.1 Code constrains and ANSI X12 relations

4.5.1.1 Code specifications:

Codes that are to be used for the message are given either

- * directly listed in the message
- * referred to as a code list known by EDIFACT
- * referred to as a Volvo known code list (referred to in the message file description as "See appendix 1") .
- * referred to as a Volvo Company known code list (referred to in the documentation.)

4.5.1.2 ANSI X12 relations:

Applications that are about to send files for conversion to corresponding ANSI X12 (850) message need to consider below cross listing. See appendix 3.

4.6 File structure

This is a description of those parts of the Orders message of the EDIFACT message, that VOLVO proposes to use in the Volvo implementation of the ORDERS message.

- file structure
- looping structure
- message content
- segment occurrence
- segment examples
- segment explanations

VOLVO application of Edifact ORDERS from versions D 96B

This is a description of those part of the EDIFACT message, that VOLVO proposes to use.

1229	ACTION REQUEST/NOTIFICATION, CODED	N

Example: RCS+5+554::92'
RCS+5+:::NOT TO BE EXPORTED TO THIRD COUNTRY'

Detail Section

Segment group 25	M 200000
-------------------------	-----------------

LIN LINE ITEM	M 1
----------------------	------------

To identify a line item and configuration. To each item corresponding to an occurrence of Group 25, a line item number is required. The buyer's product number should be placed in LIN and the supplier's product number optionally in PIA.

The message can also handle multiple consignees within same order, or multiple consignees for same LIN 7140, by repeating LIN and give other NAD consignee.

Note:

Limitation is that all NAD given in the detailed section must have the same NAD Invoicee in Header section.

1082	LINE ITEM NUMBER	O n..6
-------------	-------------------------	---------------

Item number/position.

Note:

If line item is not used then the consignee must be considered, for uniqueness.

1229	ACTION REQUEST/NOTIFICATION, CODED	N
-------------	---	----------

C212	ITEM NUMBER IDENTIFICATION	O
-------------	-----------------------------------	----------

7140	Item number Volvo's article number	R an..35

3453	Language, coded	N
7383	SURFACE/LAYER INDICATOR, CODED	N
Example:	IMD+F+++:::MORE DETAILED DESCRIPTION OF GOODS OR SERVICE'	

LIN.MEA MEASUREMENTS (O) 4

To specify physical measurements of the ordered item, where this is required for full identification of the product, including dimension tolerances, weights and counts. This segment will only be used after special agreement. Any measurements must refer to the product in its unpacked form e.g. thickness of plastic film, length, weight, etc.

6311 MEASUREMENT APPLICATION QUALIFIER M an..3

Value: PD Physical dimensions (physical attributes)

C502 MEASUREMENT DETAILS R

6313 Measurement dimension, coded R an..3

Value: HT (Height dimension)
LN (Length dimension)
WD (Width dimension)
DI (Diameter of an article)

6321 Measurement significance, coded N

6155 Measurement attribute, coded N

6154 Measurement attribute N

C174 VALUE/RANGE R

6411 Measure unit qualifier M an..3
ISO codes
See appendix 1.

6314 Measurement value R n..18(an..18)

6162 Range minimum N

6152 Range maximum N

6432 Significant digits N

7383 SURFACE/LAYER INDICATOR, CODED N

Example: MEA+PD+LN+MTR:20'

LIN.QTY QUANTITY O 10

To specify a pertinent quantity. For split or scheduled deliveries specify the quantities through the repetition of groups 32(split deliveries) or 48 (scheduled deliveries). If split or scheduled deliveries are not used, this segment is required.

C186	QUANTITY DETAILS	M
6063	Quantity qualifier <i>Value:</i> 21 Ordered quantity 31 Estimated annual volume 99 Estimated quantity	M an..3
6060	Quantity Self explanatory	M n..15
6411	Measure unit qualifier ISO codes, same as in PRI 6411. See appendix 1.	O an..3

Example: QTY+21:2:PCE'

71-LIN.ALI ADDITIONAL INFORMATION D 1 (5)

Information of article`s country of origin.

Condition:

Mandatory for articles with origin from outside the European union.

3239 Country of origin, coded R a2

Sort code according to ISO standard.
See appendix 4 or ODDC 006.

4183	SPECIAL CONDITIONS, CODED	N

Example: ALI+JP'

LIN.DTM DATE/TIME/PERIOD**O 10**

To specify date (and times if required) relevant to the delivery or pick up of goods.

Conditions:

This segment will only be used when SCC segment is not used.

C507 DATE/TIME/PERIOD**M**

2005 Date/time/period qualifier

M an..3

Value: 2 Delivery date/time, requested
10 Shipment date/time, requested
11 Dispatch date/time
61 Cancel if not delivered by this date
63 Delivery date/time, latest
64 Delivery date/time, earliest
69 Delivery date/time, promised for
323 Horizon period (Order coverage time)

2380 Date/time/period

R an..35

Format: See below

2379 Date/time/period format qualifier

R an..3

Value: 102 CCYYMMDD
203 CCYYMMDDHHMM.
616 CCYYWW, Week within a calendar year
1st week of January = week 01.
803 Week, to indicate a quantity of weeks

Example: DTM+2:19951011:102'

DTM+2:199644:616'

Illustration of Skip/Delivery week.

DTM+323:12:803'

Illustration of Order Coverage Time.

LIN.FTX FREE TEXT**O 99**

To provide free form or coded text information. The use of this segment is not recommended. When used it is important for the receiver to know in advance if the free text has to be checked before completing the process of the transaction.

4451 TEXT SUBJECT QUALIFIER**M an..3**

Value: PUR Purchasing information
PKG Packaging information
QQD Quality information
AAJ Additional information

4453 TEXT FUNCTION, CODED**N****C107 TEXT REFERENCE****O**

4441 Free text identification
The code may have to be read in conjunction with the buyer's NAD segment in order to uniquely identify the code. See Trading Partner Agreement.

6152 Range maximum
Self explanatory

D n..18

Example: RNG+4+PCE:200:500'
i.e. expected allowance for the range of 200 to 500 pieces'
RNG+3+SEK:5000:10000'
i.e. expected allowance for the range of 5000 to 10000 SEK'

Segment group 42		O 5
LIN.ALC.MOA MONETARY AMOUNT		M 1
	To specify a monetary amount for the ordered line item.	
C516	MONETARY AMOUNT	M
5025	Monetary amount type qualifier <i>Value:</i> 23 Charge amount 204 Allowance amount	M an..3
	<i>Conditions:</i> This mandatory value must correspond to what is specified in DE5463 in ALC.	
5004	Monetary amount Self explanatory	R n..18
6345	Currency, coded	N
6343	Currency qualifier	N
4405	Status, coded	N

Example: MOA+204:20000'

LIN.ALC.MOA.RNG RANGE DETAILS**O 1**

To identify a range.

Conditions:

It is used if the allowance or charge is depending on a range.

6167 RANGE TYPE QUALIFIER M an..3

Value: 3 Monetary range
4 Quantity range

C280 RANGE R

6411 Measure unit qualifier M an..3
ISO codes

Conditions:

Must be the same value as in PRI 641
segment when Quantity. If Monetary same
currency as in CUX 6345 for CUX 6343
Value of 9 = Order currency, is used.

6162 Range minimum D n..18

6152 Range maximum D n..18

Example: RNG+4+PCE:500:2000'
i.e expected allowance for the range of 200 to
500 pieces'
RNG+3+SEK:5000:10000'
i.e expected allowance for the range of
5000 to 10000SEK'

Segment group 43 **O 5**

LIN.ALC.RTE RATE DETAILS **M 1**

To specify the allowance or charge rate information.

C128 **RATE DETAILS** **M**

5419 Rate type qualifier **M an..3**
Value: 1 Allowance rate
2 Charge rate

5420 Rate per unit **M n..15**

5284 Unit price basis **N**

6411 Measure unit qualifier **N**

Example: RTE+1:2.5'
i.e. the allowance is applied per unit.

LIN.ALC.RTE.RNG RANGE DETAILS**O 1**

To identify a range.

Conditions:

It is used if the allowance or charge is depending on a range.

6167 RANGE TYPE QUALIFIER**M an..3**

Value: 3 Monetary range
4 Quantity range

C280 RANGE**R**

6411 Measure unit qualifier
ISO codes

M an..3*Conditions:*

Must be the same value as in PRI 6411 segment when Quantity. If Monetary same currency as in CUX 6345 for CUX 6343 Value of 9 = Order currency, is used.

6162 Range minimum

D n..18

6152 Range maximum

D n..18

Example: RNG+4+PCE:200:500'
i.e. expected allowance for the range of 200 to 500 pieces.
RNG+3+SEK:5000:10000'
i.e. expected allowance for the range of 5000 to 10000 SEK'

Segment group 49 **O 100**

LIN.SCC SCHEDULING CONDITIONS **M 1**

To specify a delivery schedule for the line item, e.g. to identify the quantities and delivery dates, for a specific period.

4017 DELIVERY PLAN STATUS INDICATOR, CODED **M an..3**

Value: 1 Firm
4 Planning / forecast

4493 DELIVERY REQUIREMENTS, CODED **N**

C329 PATTERN DESCRIPTION **O**

2013 Frequency, coded **R an..3**
See appendix 1.

2015 Dispatch pattern, coded **O an..3**
See appendix 1

2017 Dispatch pattern timing, coded **O an..3**
See appendix 1.

Example: SCC+1++W:14:D'
e.g. firm, weekly every Tuesday morning

Segment group 50 **M 10**

LIN.SCC.QTY QUANTITY **M 1**

To specify a delivery quantity for a delivery schedule.

C186 QUANTITY DETAILS **M**

6063 Quantity qualifier **M an..3**
Value: 21 Ordered quantity

6060 Quantity **M n..15**

6411 Measure unit qualifier **M an.. 3**
ISO codes, same as in PRI 6411.
See appendix 1.

Example: QTY+21:2:PCE'

LIN.SCC.QTY.DTM DATE/TIME/PERIOD O 10

To specify date, and/or time, or period for the quantity specified in previous segment.

Note:

The information given here may complement the pattern indicated in the SCC segment.

C507	DATE/TIME/PERIOD	M
2005	Date/time/period qualifier <i>Value:</i> 2 Delivery date/time, requested 10 Shipment date/time, requested 11 Dispatch date/time 61 Cancel if not delivered by this date 63 Delivery date/time, latest 64 Delivery date/time, earliest 69 Delivery date/time, promised for	M an..3
2380	Date/time/period <i>Format:</i> See below	R an..35
2379	Date/time/period format qualifier <i>Value:</i> 102 CCYYMMDD 203 CCYYMMDDHHMM 616 CCYYWW, Week within a calendar year 1st week of January = week 01.	R an..3

Example: DTM+2:19951011:102'
DTM+2:199644:616'
Illustration of Skip/Delivery week.

Segment group 51		O 100
LIN.RCS REQUIREMENTS AND CONDITIONS		M 1
	To specify sector/subject requirements and conditions.	
7293	SECTOR/SUBJECT IDENTIFICATION QUALIFIER	M an..3
	<i>Value:</i> 5 Automotive Industry	
C550	REQUIREMENT/CONDITION IDENTIFICATION	O
7295	Requirement/condition identification <i>Value:</i> 01 (no surface treatment) (example is a VTC preparation code) (See Trading Partner Agreement)	M an..17
1131	Code list qualifier <i>Value:</i> PC Preparation code list (example of code from VTC code list) (See Trading Partner Agreement)	O an..3
3055	Code list responsible agency, coded <i>Value:</i> 92 Assigned by buyer. In this case a Volvo Truck Corporation code list. (See Trading Partner Agreement)	D an..3
7294	Requirement or condition	O an.. 35
1229	ACTION REQUEST/NOTIFICATION, CODED	N
Example:	RCS+5+613:::92' RCS+5+02:PC:92' Volvo Truck Corporation example. RCS+5+:::ACCORDING TO DRAWING'	

Summery section**UNS SECTION CONTROL** **M 1**

To separate Header, Detail and Summary sections of a message

0081 SECTION IDENTIFICATION **M an..1***Value:* S Separate summery from detail

Example: UNS+S'

UNT MESSAGE TRAILER **M 1**

A service segment ending a message, giving the total number of segments in the message and the control reference number of the message.

0074 NUMBER OF SEGMENTS IN THE MESSAGE **M n..6****0062 MESSAGE REFERENCE NUMBER** **M an..6**

Example: UNT+23+1'
